

HOW TO RECYCLE: Construction & Demolition

RECYCLABLES

Source separated recycling & pure load types (according to materials):

- Asphalt
- Concrete
- Dirt

NO Serpentine or Asbestos-contaminated soils

- Cardboard
- Paper
- Plastic
- Metal

No Flexible Plastics

- Green Waste (e.g., leaves, weeds)
- Wood

NO Palm Fronds

LANDFILL

Materials that cannot be recovered during processing and are not recyclable:

- Broken Glass
- Ceramic Tiles
- Flexible Plastics
- Food Wrappers
- Mirrors
- Mixed Material Products (i.e., Plastic/ Metal combination)
- Non-Numbered Plastics
- Palm Fronds
- Polystyrene

DO NOT PLACE HAZARDOUS WASTE OR BATTERIES IN ANY CR&R CONTAINER

Examples of Hazardous Waste include:

- Asbestos or lead-coated materials
- Fiberglass
- Fluorescent light tubes
- Full or partially full aerosol cans
- Latex or water-based paint
- Tires

Discounted Rates For Source Separated Single Stream Material

CR&R is proud to offer competitive price advantages for customers that choose to separate their construction and demolition debris into different containers. Source separated loads contain one material type throughout the contents of the container. Please see below for examples:

- Cardboard
- Metal
- Paper
- Green Waste

CR&R reserves the right to process the load as mixed waste if contamination is observed.

Green Halo Program

The City of Laguna Beach participates in the Green Halo Program, which allows customers to track and ensure compliance with Cal Green diversion regulations. For additional information on the Green Halo Program, or Cal Green requirements, visit the City's website at www.lagunabeachcity.net/recycling

CR&R provides temporary services for all clean-up and construction projects, with containers varying from 3-yards to 40-yards in size. All bin and rolloff orders are subject to an assessment for safety and availability.

3-Yard Clean Up Bin (CUB)

A 3-Yard Clean Up Bin (CUB) is perfect for spring cleanings. Due to limited street space, 3-Yard CUBs may also be used for construction and demolition projects. The bin has a maximum weight limit of 500 pounds.

4'H x 4'W x 6'L with no lid

10-Yard Rolloff

A 10-Yard Rolloff is designed to dispose of dirt, concrete, or asphalt material. The Rolloff has a maximum weight limit of 10 tons.

2'H x 8'W x 18'-20'L with no lid

20-Yard Rolloff

A 20-Yard Rolloff is designed to transport all construction and demolition materials. The Rolloff has a maximum weight limit of 10 tons.

4'H x 8'W x 18'-20'L with no lid

25-Yard Rolloff

A 25-Yard Rolloff is designed to transport all construction and demolition materials. The Rolloff has a maximum weight limit of 10 tons.

4.5'H x 8'W x 20'-22'L with no lid

30-Yard Rolloff

A 30-Yard Rolloff is designed to dispose of wood, green waste, and many other construction and demolition materials. The Rolloff has a maximum weight limit of 10 tons.

5'H x 8'W x 20'-22'L with no lid

40-Yard Rolloff

A 40-Yard Rolloff is designed to dispose of dry wall, plumbing, and many other construction and demolition materials. The Rolloff has a maximum weight limit of 10 tons.

6'H x 8'W x 20'-22'L with no lid

CR&R is the exclusive waste and recycling hauler in the City of Laguna Beach. Utilizing a different waste hauler for your construction project violates municipal code 7.16.040, and may jeopardize your construction permit.

For rates, scheduling, or additional information, please call CR&R's dedicated Laguna Beach Customer Service at 949.662.3819.
