 WATER QUALITY DIVISION

LOW IMPACT DEVELOPMENT CONSIDERATIONS FOR PERMITTED PROJECTS

PROJECT ADDRESS: _____

Indicate in the box next to each requirement: "Yes" if implemented, "Inf" if infeasible, or "N/A" if not applicable.	
GENERAL REQUIREMENTS	
	Stormwater BMPs* are implemented onsite, close to pollution sources.
	Stormwater BMPs* are designed and implemented with measures to avoid vector issues. (e.g. mosquitos, rodents, etc.)
SOURCE CONTROL BMP REQUIREMENTS	
	Systems are in place to prevent water runoff (other than rainwater) to the storm drain system.
	Stenciling or signage is in place on property storm drains.
	Outdoor material storage areas protect from rainfall, run-on, runoff, and wind dispersal.
	Trash storage areas are protected from rainfall, run-on, runoff, and wind.
LOW IMPACT DEVELOPMENT (LID) BMP REQUIREMENTS	
	Natural storage reservoirs and drainage corridors are maintained or restored.
	Buffer zones are in place for natural water bodies.
	Natural areas are conserved (including existing trees, vegetation and soils).
	Impervious footprint is minimized.
	Soil compaction to landscaped areas is minimized.
	Impervious surfaces are disconnected through distributed pervious areas.
	Landscape and impervious surface areas are designed to effectively receive and infiltrate, retain and/or treat water runoff from impervious areas.
	Small water collection strategies are in place that are in close proximity to the place where runoff would impact the ground.
	Permeable materials are used for low traffic areas and appropriate soil conditions.
	Native or drought-tolerant landscaping is used.
	Rainwater harvesting and use strategies are incorporated in the project.

*Stormwater BMPs = Best Management Practices used to control water runoff and pollution from properties. Regulations are required pursuant to Municipal NPDES Stormwater Permit Order No. R9-2013-0001 As amended by Order No. R9-2015-0001 and Order No. R9-2015-0100
